No. 1767.—*Erratum*.—In the Notification of the Government of India in this Department No. 1043, dated the 17th February 1923, published on pages 183 and 184 of the *Gazette of India*, Part I, of the same date *for* the words "warp or weft" occurring in items 10 and 26, *read* "warp and weft".

No. 70.—The following Circular No. T.M. 24-40-1234, dated Fort St. George, the 5th April 1923, from W. D. Waedham, Esq., Accountant General, Madras, to all Heads of Departments and Treasury Officers, is published for general information.—

I have the honour to issue the following explanation and amendments to paragraphs 8 and 2 (*a*), respectively, of the instructions conveyed in my circular letter No. T.M. 24-40-537, dated 15th March 1923:—

(i) *For* the first sentence of rule 8 (Fundamental Rule 81) *substitute* the following:—

The only distinction which the Fundamental Rules make between a vacation and a non-vacation officer is that the leave account and the amount of leave which can be taken on average pay have to be calculated for the former in the light of Fundamental Rule 81 (*b*) and that the waiving of the maximum limit for leave salary is subject to the condition in Note (2) to Fundamental Rule 89. A vacation officer can be given leave on average pay provided that the leave is at his credit and that the maximum prescribed in Fundamental Rule 81 (*b*) (ii) calculated with reference to Fundamental Rule 82 (*b*) is not exceeded. The effect of this ruling is that an officer of the vacation department who enjoys such vacation can have leave on average pay without the production of a medical certificate to the extent of 1/11th of duty subsequent to 1st January 1922 *minus* one month for each year of duty or a proportionate fraction thereof if the period of duty is less than a year.

(ii) The expression 'that portion of leave which corresponds to privilege leave' occurring in paragraph (4) of the Government of India, Finance Department letter No. 1070-C.S.R., dated 26th October 1921, forwarding the Fundamental Rules should be interpreted to mean in the case of leave taken after 1st January 1922, the first four months of any period of leave on average pay or any longer period of leave during which Note (1), under Fundamental Rule 89, makes maximum limits of average pay inapplicable. Such leave is in all other connexions being treated as though it were privilege leave and may be treated similarly in this connexion also.

II. The following audit instruction has been issued under *Fundamental Rule* 105 (*b*).

The intention of sub-clause (i) of this rule is that joining time should be allowed to those Government servants who are granted privilege leave or leave on average pay for four months or less, or those who are granted privilege leave up to a maximum of six months under the special war concessions and who are transferred to a new station on the termination of such leave.

III. Leave not due may be granted to an officer under Fundamental Rule 81 (*c*) only when there is a prospect of his returning to duty and earning the equivalent to the amount of "leave not due" which he has taken.

Secretary to Government.

NOTIFICATION.

Fort St. George, February 5, 1923 [*G.O. No.* 71, *Finance (Marine)*].

No. 32.—The Government have had under consideration the question of insurance of Government stores sent from England so as to cover damage during transit from shore to shore. The risks of this Government up to the time of the arrival of the goods at the port are covered by the Marine Insurance effected by the Director-General of Stores for which one per cent is added to the cost of stores. The Government consider that this insurance is sufficient to cover the risks during transit, i.e., till the stores leave the ship's side. They, however, observe that very little advantage has, in practice, been taken in the past of the Marine Insurance—perhaps because claims have not promptly been preferred.

In order that such a contingency may be avoided in future the following particulars about Marine Insurance are brought to the notice of indenting officers:—

(1) A loss would be chargeable to Marine Insurance when the responsibility for the breakage or shortages cannot be fixed on the ship-owners (in consequence of clauses in Bills of Lading or otherwise) or on the contractors for defective packing, or elsewhere.

(2) The particulars required in reporting a loss are those shown in the instructions on the packing account, viz., description of stores, details of the numbers of the packages, and where necessary, the sizes and quantities of the articles; also when articles are missing it is useful to report the actual gross weights of the packages as received. Further, a statement should be made, when such is the case, that recovery of the value cannot be obtained in India and the reasons should be given.

(3) In cases where a loss is properly chargeable to 'Marine Insurance' a corresponding credit is given to the department or province concerned, and a credit invoice is sent accordingly.

Indenting officers are requested to see that in cases of loss or damage, claims are promptly made against the shipper, contractors or Marine Insurance as the case may be.

2. The charge of one per cent for insurance and other miscellaneous expenses on stores supplied to India through the Director-General of Stores covers ordinary marine risks. Brittle stores such as stonewares pipes landed at Tuticorin and Coconada are subject to special risks. It is therefore essential that delivery at these ports should be required only during the period when the risk of breakage is at its lowest. Indenting officers are requested to bear this in mind and indicate in their indents whether such delivery is essential, so that the risk of breakage due to landing at those ports may be avoided if possible.

A statement showing the times of the year at which the unloading of brittle stores from vessels at the principal outports is attended with the least risk is given below for the information of indenting officers:—

Name of port.	Period of safe landing of brittle stores.
Gopalpur	November to January inclusive
Vizagapatam	December to February do.
Coconada	April to September do.
Cuddalore	February to September do.
Negapatam	Do.
Pamban, North only	Early March to September inclusive
Tuticorin	January to May inclusive and September and October.
Cochin	October to April.
Calicut	October 15th to May 30th.
Telhoberry	
Mangalore	

3. Officers indenting for stoneware or cast iron pipes are informed that, in order to provide against the inconveniences which may be caused by breakage, it is advisable to consider whether demand should not be made for somewhat more piping than is actually required.

R. S. LLOYD,
Secretary to Government.

No. 38.—The following notification of the Government of India is republished :—

FINANCE DEPARTMENT.

ACCOUNTS AND FINANCE—ESTIMATES AND ACCOUNTS.

Delhi, the 29th March 1923.

No. 862-F.—The following statement is published for general information:—

A statement by His Excellency the Governor General of the reasons which moved him to pass an order under section 67B of the Government of India Act for certification of the Indian Finance Bill as originally introduced in the Legislative Assembly, providing for an increase in the existing salt duty for one year, (i.e.) till the 31st March 1924, to a rate of Re. 1-8-0 a maund.

STATEMENT.

In the course of the debates on the Finance Bill I was deeply concerned to find that I and my Government were in disagreement with the majority of the Legislative Assembly in regard to the necessity of imposing an increase in the salt tax from Rs. 1-4 to Rs. 2-8 per maund in order to balance the Budget and produce financial equilibrium. The Bill as introduced with this provision was not passed by the Legislative Assembly in the form proposed by my Government. It was recommended by me, in the original form proposed, to the Council of State where it was passed by a majority of 18 votes. It was returned to the Legislative Assembly in the form recommended to the Council of State and rejected by a majority of 11 votes. I have a high respect for the convictions of the Legislative Assembly, but after careful consideration I find I cannot subscribe to them; and I have decided to exercise the special powers with which I have been invested by His Majesty's Government under the provisions of section 67B of the Government of India Act and to certify the Bill. I have arrived at the decision after much anxious thought and deliberation and I desire to make clear my reasons for taking this action.

From the time I came to India and learnt the financial conditions I have been deeply impressed by the imperative necessity of placing India's finances on a sound basis and have kept this object continually in view. The first Budget after my arrival was that of 1922-23. It then learnt that there had been cumulative deficits in the four preceding years totalling 80 crores. Heavy increases of taxation had been imposed by my predecessor's Government in 1921-22 in order to balance the budget. Taxation had again to be enhanced by my Government in 1922-23 and an increase was also made in the postal and railway charges. It will be remembered that at that time my Government also proposed to double the salt duty. The Legislative Assembly rejected this proposal; I accepted their decision and did not certify the necessary legislation for the purpose. Without dwelling in detail on my reasons it will suffice to mention (a) that my Government were deeply impressed with the need urged by the Legislature for retrenchment in both military and civil expenditure as a necessary step to precede any further taxation of this nature; (b) that food prices were then high and wheat in particular exceptionally high. When we came to frame the Budget of the present year we found that notwithstanding the admirable work accomplished by Lord Inchcape and his Committee, and after making very far-reaching reductions in expenditure, we had again to face a deficit not so large indeed as last year, but nevertheless amounting to nearly four crores. We have striven our utmost to restore equilibrium by scrutiny of estimates of revenue and expenditure but have failed. Speaking with all the responsibility falling on me as I say Government I am convinced that the position cannot be ameliorated by any addition however tempting in appearance to revenue or by any reduction from expenditure.

My Government held that in view of the past accumulated deficits it was essential in the interests of India to balance its budget. It had every reason to look for the support of the public and the Legislature in this view. Ever since my arrival in this country the Legislature, all sections of the press and public men in deputations, addresses and speeches have insistently urged on me the vital necessity of securing financial equilibrium. In addition representations had persistently been made that the Government of India should balance its budget in order that it might begin to remit the contributions of 9½ crores from the provincial Governments to the Government of India, a matter vitally important to the progress of those departments which have, under the Reforms Scheme, been committed to the charge of Ministers.

The rehabilitation of India's credit by presenting a balanced budget was not a measure which could be delayed. The need for large capital funds for material development obliges the Indian Government to enter the money market for considerable sums both in England and India; it would be on the highest degree unfortunate if it had been obliged to present a deficit for the sixth year in succession, and when the circumstances no longer permitted a hope that the deficit was merely temporary or was one which would yield to a determined effort at retrenchment. Reductions have been made in military charges which seemed incredible a year ago. The Government of India have stated that in making these reductions we are taking military risks, but we feel that we are justified by the financial stringency. His Majesty's Government have agreed in principle to the reductions. In the civil departments similar retrenchments of a far-reaching character have been accepted. If after making these efforts we still had to present a deficit, there was every possibility that the fact would react on our position as a borrower. Our hopes for a gradual reduction in our interest charges would be frustrated with results damaging not only to India's progress as a country, but to every industrial and trading interest in the land. The provinces have now their own commitments for capital expenditure on their material development. Their interests would suffer even more severely than those of the Central Government in proportion as their resources are more limited.

The most careful and anxious consideration was given to the possibility of finding an alternative to the salt tax as a means of raising the additional revenue necessary to attain equilibrium. No alternative presented itself to Government nor indeed, when the matter came to be discussed, to the Legislature. The reason is obvious. Those engaged in trade and industry have had laid upon them heavy increases in taxation during recent years. Postal and railway rates have been enhanced. The burden thus placed on commerce and industry will require time for adjustment, and further taxation in these directions would have failed to provide the sum required. I have myself given most careful consideration to the objections which appear to exist against the enhancement of the salt tax whether on economic grounds or those of sentiment. The tax is said to have historic unpopularity; but it existed before British rule. In the period from 1861-1877 it stood in Northern India at Rs. 3. In 1878 the rate was Rs. 2-12-0. From 1879-1881 and again from 1888-1903 it stood at Rs. 2-8-0 and since 1878 it has been at Rs. 1-4-0. The objection is thus not to the tax itself but to the present enhancement. Every increase in the rate of a tax is unpopular; yet it must be remembered that it has been collected in the ordinary way at the enhanced rate throughout British India since the 1st of March of this year. The economic arguments against the tax appear to stand on such enhancement will press more lightly on the poor. Wages are still on a favourable basis, but prices of foodstuffs have markedly fallen and with the abundant promise of a rich harvest around us may be expected to decrease still further. Even a slight fall in the price of foodstuffs is of great

importance to the poor family. The mill labourer is shown to spend approximately 61 per cent of his income on food and of this amount salt represents only two fifths of 1 per cent. The increase in salt tax must have an infinitesimal effect at a period such as this, prices of food grains fell by 20 per cent between October 1921 and December 1922; between January 1922 and 1923 retail prices of wheat fell by 100 per cent in important centres of Northern India

These considerations were duly laid before the Legislative Assembly. That body had from the first admitted in principle the paramount necessity of balancing the budget. Many of the members had emphasised the need of regaining equilibrium as a necessary preliminary to fulfilling our obligations in regard to the gradual reduction of provincial contributions; and it is indeed obvious that no step in this direction can be taken so long as the finances of the Central Government are in deficit. The Assembly was unable to agree on the adoption of any alternative form of taxation which would secure the full amount required. Nevertheless, it rejected the proposal for an enhancement of the salt tax It was in these circumstances that it became my duty to certify the measure It must be clearly understood that my action merely imposes an enhancement of the tax until March 31st, 1924, when the matter must again come before the Legislature It will then have had a year's experience of the operation of the tax, and it will be in a position to determine whether, in view of the condition of the country and having regard to our obligations to the provinces, it will vote for its retention.

I hold strict views regarding the exercise of my special powers; their use can only be justified, in the words of the Government of India Act, when it is essential for the interests of British India. This requirement has throughout been present to my mind. In the present case the interests of India only and no other interests are in question. A balanced budget is absolutely essential to her interests at the present time, and I believe that it is my duty to take the necessary action to secure this in the discharge of the responsibility placed upon me as Governor-General by the Imperial Parliament.

It may be that the scheme of reforms introduced by the Government of India Act will be attacked on account of the action taken by me. This would be unfortunate and could only be due to misapprehension; for the constitution is embodied in the Act, and I do not believe that there is any substantial difference as regards the meaning of the important provisions under which I am acting. Unbalanced budgets appear to me to involve dangers to the future of India perhaps inferior greater than any constitutional or political issue, while their immediate effect is to stifle the development in the provinces of all those beneficent activities, *e.g.*, Education, Public Health, Industry, which should be the first fruits of the reforms. I am convinced therefore that my action will prove of ultimate benefit in the development of the reforms and the advancement of India and for these I shall continue to labour in the discharge of the high responsibilities entrusted to me as Governor-General.

PRESS COMMUNIQUÉ.

No. 101.—In a Press Communiqué, dated 12th May 1919, the Government announced the appointment of a Deputy Director of Agriculture, Live-stock, in the Agricultural Department and therein also defined his duties. The appointment was made on 24th April 1919 and the following is an account of the work which has been done since then with an indication of the lines along which future work will be continued.

1. *The establishment and management of stock farms in localities in which a good breed of cattle exists.*—An Ongole Cattle Farm was opened in June 1918 for the purpose of breeding Ongole cattle. This farm is situated at Chintaladevi, about 38 miles from the Kavali railway station, and is roughly 800 acres in extent, 250 cultivated and the remainder in pasture. The permanent buildings are not yet ready. About 240 acres of land have been broken up and 50 acres brought under irrigation to grow fodder. No big yields have been harvested and the land needs systematic manuring. Wells are being sunk as the water in the Musal channel is stopped each year from May to September.

Funds have not yet been found to start the proposed Kangayam farm

A buffalo-breeding station has been opened at Samalkota for the purpose of rearing good breeding bulls, and this work will be continued at Guntur.

2. *The preservation on such farms of valuable strains of indigenous cattle and the distribution of good stock therefrom.*—The stock in the Ongole farm consists of 51 cows, 1 breeding bull, 14 heifers—one to two years old—and 10 calves under year old, a bull from two to three years old, 20 bulls—one to two years old—and 15 bull calves. Six good bull calves have been specially selected and put on extra rations to force them on. They should be ready to be placed out in the districts next year, 1924.

Milk recording was begun last year. As all the calves suckle their dams the cows are milked dry one day in the week only and an average taken. All animals which give 15 lb. of milk and over are specially looked after. During the next five years, their bull calves when old enough will be placed in certain districts of the Ongole tract where dairy cows are bred, and possibly one or two may be sent to Madras to serve Ongole cows in the city.

Experiments are being conducted to see if Ongole cattle will come to maturity earlier by extra feeding. A group of calves are weighed and measured each week to obtain information on the point.

One good breeding bull and eight to ten good cows will be purchased this year to add to the stock and it is hoped to have six bulls ready next year (1924) to be placed in the districts. This number will increase year by year.

Two Kangayam bulls were purchased some years ago from the Pottagar of Palayakottai Fund are has turned out a good stud bull. Seven good Kangayam cows have been purchased and these and the bull have been placed at Chintaladevi and from this stock a herd will be built up so that, when funds are available and the Kangayam farm can be started, material will be ready.

Of 24 buffalo calves purchased in the Godavari district, none grew into big animals, but finally seven were selected. Three of these are at stud at the Nandyal farm in Kurnool district, three are in Madras City, and one is at Samalkota.

It is proposed to lay the foundations *of a herd* at the newly-opened Guntur farm where 150 acres are reserved for the purpose by purchasing 10 to 12 good she-buffaloes of good milk strain and to allow the calves to suckle their dams. It is hoped in this way to produce larger bulls during the next five years as the calves are usually half-starved in their early life and their growth stunted.

There appear to be no buffalo bulls in most places and buffaloes are served by half-mulled work animals. Hence there is a great need for good buffalo bulls.

3. *The formulation of systematic measures to improve the draught and milking qualities of cattle by selection and crossing.*—Four Ayrshire bulls were brought out from England in 1920 to serve milch cows in Madras, the idea being to select the best calves from the mixed progeny to rear as cross-bred bulls for breeding purposes. This plan, however, proved a failure. Two of the bulls have died and another refused to serve in Madras. The milkmen did not make good use of these bulls and the cows served were mostly the property of private and wealthy owners. Very few of the calves produced were cared for and they were all stunted in growth and unfit for breeding purposes.

The two surviving bulls were protected against rinderpest by the serum simultaneous method and early this year were sent to Ootacamund to serve the pure-bred and cross-bred cows there, which number about 240 in Ootacamund and 60 in Coonoor. These cattle are chiefly owned by Europeans and the calves are better looked after and we shall be able to select bulls from the progeny of these cows. One of the bulls has recently had to be destroyed as he was incurably ill.

There were 14 Mongrel bulls in Madras City last year, most of them with some Australian blood in them. The majority were poor, no arrangements were made to bring in any of our cross-bred bulls from Bangalore to Madras for stud purposes. These bulls were the progeny of imported Ayrshire bulls and selected Sindhi and Sahiwal cows known to be of a good milking strain from their milk records. A service fee of Rs. 2 is charged and the number of cows being served is increasing monthly and the bulls are becoming popular. In this way, it is hoped during the next five years to squeeze out all the Mongrel bulls from Madras City and in time Government will have a monopoly and will be able to control the breeding. If cross-bred bulls are a failure, pure Indian breeds can replace them.

Three buffalo bulls of good milking dams have also been placed at stud in Madras and they are serving a good number of buffaloes in the City.

The work at present being done consists to a large extent in cross-breeding with English bulls of known milking strain. This is the quickest method of grading up the dairy as the milk yield of Ayrshire dams is often treble and quadruple that of country cows, and an improvement in the daughters of these sires is very evident. The disadvantage is that these cross-bred animals are not so immune to disease as ordinary Indian breeds. Rinderpest can be guarded against to a large extent by inoculation, but foot-and-mouth disease is still rife and a source of danger and loss to the dairy farmers.

The breeding experiments at Bangalore were started with the object of doing two things:

(*a*) Producing a cross-bred dairy cow with a high milk yield in order to improve the milk supply of towns, and

(*b*) Producing an animal which would be immune to rinderpest.

Both these objects are of the greatest importance not only to the Madras Presidency but to India as a whole. The Madras milk supply cannot be improved till we have got a strain of cattle which we can reproduce at will and in any desired quantity which give a great deal more milk than the ordinary country cows. The Ongole cow, which is the best dairy cow, only calves about once in three years and then only gives 3 lb. of milk a day at the most during lactation and if taken from the calf to another averages only 4 to 5 lb. a day. This will not repay the milkmen for feeding and attention. Immunity to disease would save lakhs of cattle and rupees each year.

These objects can only be obtained by following out a definite policy of breeding, just as a new strain of paddy or cotton is produced or a new sugarcane, which give an increased yield and are resistant to disease. It is no good (as far as these particular objects are concerned) importing good pedigree bulls and letting them serve cows of all descriptions in the hope of obtaining something good. Too much of this has been done in the past and the result is just nothing. A few individual cows may be produced with an increased milk yield, but these are probably mated with poor country stuff and the milk character disappears again in the second and third generations. So some definite, continuous policy must be pursued till a number of animals are produced (a cross-bred milch herd in fact) which possess the valuable characters aimed at, and the members of which can be crossed among themselves to reproduce as many as are desired.

Moreover, it must be done with cross-breds. If pure Indian stock is used, the milk yield of the resulting herd can only be raised to a certain definite point by careful selection of only the very best of the progeny. With a cross-bred, however, the very high milk yielding character of the Ayrshire can be introduced into the Indian cow which raises the milk yield above anything a pure Indian strain will give. At the same time, it is desirable to produce pure-bred Indian cattle (*a*) for the sake of comparison with the cross bred herd (*b*) for special purposes such as draught cattle, and (*c*) in case the cross-breeding does not ultimately prove a success for some reason at present unforeseen so that there may be other material to fall back on, better than the usual country stock.

The country stock are bad—and getting worse—because no attempts are made at pure breeding. The bulls are allowed to run with the herd, strains are mixed haphazard, cross-breeding of quite the wrong kind is also in place. The result is chaos. If the cattle in India are to be improved, herds must be found which are either pure bred or bred to a particular type and perseverance in one of types practised. For example, Ongole and Kangayam are draught animals, while the Sahiwal is a milk animal. If these two breeds are mated, the resulting cow may give a few pounds of milk extra per

day, but the male progeny will be reduced in size and unsuitable for draught. The consequence is that one strain at least has lost its value and the other has been little, if any, improved. Another very important point is to raise a strain with a longer lactation period and one which calves more frequently, so as to raise the daily milk average. Country cows are dry for long periods during which time they are a loss to the milkman and he cannot afford to feed them properly.

Having explained the exact object of the Bangalore experiment, let us see how far success has been obtained. The *first cross* between Ayrshire bulls (carrying the milk yielding character) and country cattle gave animals—

(1) giving two to three times as much milk as the country cow,

(2) with a lactation period of nine months,

(3) which breed regularly and are only dry six weeks to two months in the year (as compared with the country cow 3 to 6 months dry).

The following figures from the records kept at Bangalore illustrate these points very clearly.

Animal.	Cross-bred cows. Milk yield. Total.	Cross-bred cows. Milk yield. Daily average.	Country cows Milk yield. Total.	Country cows Milk yield. Daily average.
	lbs.		lbs.	
No. 1	8,458	24·9	2,541	12·1

Total of six animals ..	64,606	327 4	33,989	110 2
Average per lactation ..	4,872	21·8	3 395	11 6

The following are two typical weekly reports for the Bangalore Dairy.

	Week ending 11th March 1922. Cross-bred.	Country.	Week ending 24th June 1922. Cross-bred	Country.
Average number of cows in milk per day ..	18·3	10·5	18 8	14 1
Average of whole herd	14 3	4 5	13·8	8 8
Number of cows in milk	114	18	104	31
Number of cows dry	8	13	6	12

These figures show very clearly the excellent results obtained in the *first generation* of the cross. The cross-bred cow gives nearly twice as much milk as the country cow and is a very regular breeder. While only 3 to 5 per cent of the cross-bred herd are dry, 52 to 67 per cent of the country herd are dry.

The future lines of the experiment should be as follows:—

It must be found out whether these cross-bred animals when *mated together* still keep their high milk yield and also if they are immune to disease. This work has been begun. At Bangalore, there are 16 heifers and 5 bulls of this *second generation*, that is the progeny of the first lot of cross-bred bulls and cross-bred heifers. The next step is to mate these and see what the *third generation* is like. This will take another two years or so, and it is proposed to do this work at Coimbatore for the sake of economy. The *second generation* are good and promising animals and the experiment certainly ought to be continued and completed so as not to lose that has been gained. No more Ayrshire bulls are needed as there are quite enough cross-bred bulls now for our purpose. When a really good cross-bred bull which breeds good calves with a high milk yield and immune to disease is obtained, the object of the experiment is obtained.

As regards immunity to disease this is tested when the herd is inoculated. It is found that some cross-bred calves will not "take"—that is, they are immune to the disease. It is necessary to discover now:

(a) whether this immunity is an hereditary character,

(b) whether it is combined with milk yield. If it is, then we can attain the second object of the experiment, which is of the greatest importance.

Cross-bred bulls from these cows when used in India on cross-bred cows tend to increase the milking properties of the cattle. This is being done at present in the Madras City, Cross-bred bulls from Bangalore being used for stud purposes. The work is not being done in district towns because sufficient control cannot be exercised over the inoculation of the progeny against rinderpest.

Whether these cross-breds and their progeny can be permanent dairy cattle of Madras or not remains yet to be proved.

4. *The formation of Milk Record Societies, etc.*—A detailed survey of the Madras Dairy trade has been made and it was decided that it was impossible to form such milk record societies, but the improvement of the dairy business has been investigated and a Milkmen's Association has been formed. Some twenty members took out five-rupee shares, and subscribed locally from the Penitentiary and sold daily to the milkmen. At the end of eighteen months a profit of one thousand rupees has been made. The association was duly registered and this profit was divided up amongst the members according to the amounts of their purchases, five-rupee shares being taken out in their names up to a maximum of one hundred rupees per member. The running of this association has now been handed over to the President and Secretary to manage. In future, an agricultural demonstrator posted in Madras will visit the milkmen, and urge those who have not already done so to join the Association. He will advise them how to feed and rear calves and advertise the fact, that

Government have good cross-bred bulls at stud in Madras for a service of two rupees. This propaganda work is already being carried out.

b. The investigation of the problem of transporting milk.—This work has been done in the Central Provinces and the results published by Allen in the Agricultural Journal of India and it has not appeared necessary to repeat the work in the Madras Presidency. There has at present been no chance of utilizing the knowledge gained.

c. The examination of problems connected with dairying and the provision of advice and help.—A survey of the whole Ongole breeding tract is being made and particulars recorded about all the animals in each village with a report on the quality of the breeding bulls and methods of feeding and rearing. When this is completed, arrangements will be made to meet the District Boards in these tracts and urge them to take up the question of providing good Ongole bulls for breeding in the villages in the district.

A survey of buffaloes is also being made in the Cuddapah and Kurnool districts and the Deputy Director of Agriculture, Live-stock, has surveyed the animals in the Godavari and Guntur districts. When the preliminary work is finished, proposals will be formulated for laying down the foundation of a buffalo herd on the newly-opened Guntur Farm.

7. *The programme of work in the future.*—The programme of work for the next five years may be summarised as follows:—

(1) The continuance of the work on the Ongole Cattle Farm at Chintaladeri and the opening of a Kangayam Farm.

(2) The establishment of a buffalo farm on the new Agricultural Farm at Guntur.

(3) The distribution of breeding bulls from Chintaladeri to the districts beginning in 1923 with six and increasing the number each year.

(4) The distribution of breeding bulls, the progeny of high milk yielding mothers, to the Ongole tract and Madras in gradually increasing numbers.

(5) The building up of a Kangayam herd in Chintaladeri to be transferred to a Kangayam Farm when this can be opened.

(6) The laying of the foundations of a buffalo herd at the Guntur Farm and the production of large bulls for breeding purposes.

(7) The provision of good cross-bred bulls available for service in Madras City and thus squeezing out the Mongrel bulls and getting a monopoly of breeding and thus raising the milking qualities of the cattle and improving the City dairy industry.

(8) The continuance of the Bangalore breeding experiments but transferred to Coimbatore; there to try and raise a type of animal, which will breed true yield more milk and, at the same time, be immune to rinderpest and, also the production of a good draught animal.

(9) The formation and encouragement of Milkmen's Associations and propaganda in connexion with them.

(10) The completion of a cattle survey of the Presidency.

(11) The completion of the buffalo survey of the Madras Presidency.

(12) Co-operation with district boards with regard to breeding Ongole cattle.

LOCAL SELF-GOVERNMENT DEPARTMENT.

APPOINTMENT.

Fort St. George, April 10, 1923.

No. 310.—Under sections 7 (3) and 21 of the Madras District Municipalities Act, 1920, the Government appoint M.R.Ry. Pushani Kumara Pillai Subbayya Pillai Avargal to be a Councillor of the Pollachi Municipal Council.

NOTIFICATIONS.

Fort St. George, April 5, 1923 (*G.O. No* 806, *L. & M.*).

No. 311.—Local bodies frequently apply for the exemption of unqualified persons for appointment as sub-overseers or overseers under them. As, however, a large number of qualified temporary subordinates of the Public Works Department have been thrown out of work by the recent retrenchments in that department and are now available for appointment, the Government consider that instead of appointing unqualified persons, local bodies would do well to employ these qualified subordinates. Presidents of local boards and chairmen of municipal councils are informed that no applications for exemptions of unqualified men not already employed in the Engineering Departments will be entertained by Government in future till every one of the qualified subordinates referred to above has been provided for or given a reasonable opportunity of suitable employment in the service of a local board or a municipal council. Lists of the temporary subordinates of the Public Works Department who have been thrown out of work by the recent retrenchments are appended to these proceedings.

APPENDICES.

(1)

List of temporary lower subordinates whose services have been dispensed with by the Public Works Department owing to reduction of establishment.

In the mofussil.—Heads of institutions who are desirous that their pupils should be examined in batches and private candidates who desire to be similarly examined should make the necessary arrangements with the Chief Superintendent concerned *two days* before the examination and furnish him with all necessary information as to the number of candidates and machines and the time at which such batch should attend on the day fixed for the examination.

At Madras.—Heads of institutions and private candidates should make similar arrangements with the Secretary to the Commissioner for Government Examinations on the 15th and 16th April between 11 a.m. and 5 p.m. at the Old College, Nungambakam.

At Madras.—In the case of candidates for the Elementary and Intermediate grades, tickets of admission specifying the particular batch (first or second and so forth) in which they elect to appear will be issued on these days. These tickets should be shown at the entrance. Candidates who produce tickets will be admitted in the batch specified in the tickets. Candidates who do not provide themselves with tickets cannot claim to be admitted to any particular batch. They will be

admitted only if spare seats are available in the hall, i.e., after seats are reserved for those who have registered their names and obtained tickets for the batch. Candidates who do not hold tickets will accordingly have to wait at the entrance from the hour of commencement of the first batch and take their chance of being provided with seats in the first or in any subsequent batch. To avoid all inconvenience and possible disappointment heads of institutions and private candidates are particularly requested to call at the office on the 18th and 19th April and obtain tickets. No tickets can on any account be sent by post whether to heads of institutions or to private candidates.

Candidates for the *Advanced grade* may appear for the first or second batch at their option and no tickets accordingly are issued for this grade.

At Madura.—Managers and instructors of institutions and other persons who wish to be allowed into the examination hall to inspect the machines and remedy any defects should call at the office on the 18th and 19th April and have their names registered. Tickets of admission specifying their names, the institutions to which they belong, etc., will be issued to them and these should be produced at the entrance to the examination hall.

The examination in Typewriting will, wherever the candidates have to be examined in batches, be conducted as in the following time-table:—

Batch	Elementary examination.		Intermediate examination.		Advanced examination.	
	First paper.	Second paper.	First paper.	Second paper.	First paper.	Second paper.

Fourth batch ..	3 p.m. to 3-30 p.m.	3-40 p.m. to 5-10 p.m.	....	....	....	....

N.B.—*No candidate will be allowed to leave his seat in the interval between the first and second papers.*

In the case of the *Elementary* examination, candidates of the first and the second batches will not be allowed to leave the examination hall until 12-10 p.m., and no candidate for the third and fourth batches coming after this hour will be admitted in the examination. For the *Intermediate* examination, candidates of the first batch will not be allowed to leave until 10-40 a.m., and no candidate for the second and third batches coming after this hour will be admitted. Similarly for the *Advanced* examination, candidates of the first batch will not be allowed to leave until 1-10 p.m., and no candidate for the second batch coming after this hour will be admitted. Candidates that have such a separate machine and that do not want to be examined in batches are expected to appear for their examination with the third batch for the Elementary, and with the second batch for the Intermediate and Advanced examinations.

Managers and instructors of institutions concerned will be allowed into the examination rooms *in the intervals between the examinations of the various batches* to inspect the machines and to remedy any defects.

If a candidate reports to the Superintendent that his machine has gone out of order, the Superintendent will intimate this to the manager or instructor if he is waiting outside on the premises, and will permit such manager or instructor to enter the hall or room (though the candidates may be at work) to inspect the machine and to remedy the defect or to supply another machine. It must, however, be clearly understood that the Superintendent incurs no responsibility in this matter; his action will be purely *ex gratia*, the whole responsibility resting on the candidate and the manager or instructor.

A similar concession will be allowed to the case of a private candidate if he has some one outside who is willing to inspect the machine and put it *right*, etc.

No extra time will be given to candidates to compensate for loss of time while the machine is out of order and being put right.

GOVERNMENT TECHNICAL EXAMINATIONS, APRIL 1923.

Candidates in *all* the subjects must bring with them for use in the examination their own PENS AND PENCILS. Candidates are also informed that they must bring their drawing instruments with them for those subjects which require plans to be copied or scales and diagrams to be drawn. The drawing paper required will be supplied to them at the examination.

Candidates in *Surveying and Levelling* (*Advanced grade only*) will be allowed to bring with them their mathematical tables for use in the examination.

Candidates in carpentry, and any other subject, the practical examination in which requires the use of tools, etc., must bring their own tools, etc., with them.

Candidates in Book keeping, Commercial Geography, Shorthand and Type-writing will be expected to bring with them for use in the examination hall their own rulers, erasers, knives, pencils and pens.

Candidates for examination in the subjects under "Commerce" will be allowed also to bring with them ink of two or more colours (other than black ink) for map-drawing, drawing lines in Book-keeping, etc.

Candidates in shorthand will be allowed to transcribe their shorthand notes with a type-writer. They will not be supplied with any "thick" paper for the purpose, but will be allowed to bring with them their own "thick" paper, if they wish to use such paper. The use of carbon paper will on no account be allowed in transcribing the shorthand notes with a type-writer. If the machine used by a candidate, however, goes out of order, no extra time will be given to him to compensate for loss of time while the machine is out of order and being put right.

Candidates in type-writing will have to bring their own type writers also and the necessary carbon paper with them and must specify clearly on their answer papers the particular kind of machine used by them as, otherwise, their answer papers will not be valued.

Attention is drawn to the following rules:—

1. No candidate will be allowed to enter the examination room unless he wears a clean and decent dress, and in all cases where good manners require it, a suitable covering for the head, nor will he be allowed to keep his shoes on unless they are shoes of English pattern, and socks and trousers are worn also.

No candidate suffering from any contagious disease will be admitted to the examination room.

2. No candidate will be allowed to quit the examination room on any day until the expiration of half an hour from the time fixed for the commencement of the examination, and candidates arriving after the expiration of that half hour will not be admitted.

3. No candidate will be allowed to re-enter the examination room during the hours of examination after once quitting it, nor to leave the room without finally giving up his answer papers.

4. Any candidate detected in speaking to, or in any way communicating with, any other candidate will be at once removed from the room and the circumstance reported to the Commissioner.

5. Any candidate who does not behave properly towards the Chief and Assistant Superintendents of the examination or is suspected of having had recourse to malpractice of any kind is liable to have his examination invalidated and also to be debarred from appearing again for any of the examinations under the control of the Commissioner for such term of years as the Commissioner may think fit, or, *if the Commissioner is not satisfied for any reason whatever as to the trustworthiness of his results*, he may be required to undergo a re-examination at some future date to be fixed by the Commissioner.

in any one or more of the subjects of the examination for which he appeared, his success or failure being determined on the results of such re-examination.

6. *No candidates will, on any account, be allowed to take into the examination room ink, slates, books, rolled sheets, manuscripts or papers of any kind.* Any one detected in the violation of this rule or having recourse to any unfair practices, will be removed from the room, and the occurrence reported to the Commissioner. The use of mathematical instruments for drawing figures or ruling lines will, however, be allowed.

7. Candidates whose names are not in the printed list furnished to the Superintendents must submit a written declaration through the Superintendents giving full particulars in regard to themselves, including their address, and furnish such evidence as may be possible of their having applied for admission to the examination at the proper time and paid the prescribed fees. The answer papers of such candidates will not be valued unless it is clear that the omission of their names is due to no fault of theirs.

8. Candidates choosing to change their place of examination without previous permission, or appearing at any centre other than the one at which they ought to have appeared according to the notice published in the Gazette, must not expect to have their papers valued or their results published. In all cases where permission has been granted, the memorandum or letter permitting the change should be produced for the satisfaction of the Superintendents.

9. Candidates may have to write their answers on both sides of the paper supplied to them and they will receive the necessary instruction on this point in the examination hall from the Chief Superintendent of the examination.

10. A candidate having completed his paper will rise from his seat and remain standing until the Superintendent takes his answer papers. Any candidate wishing to ask any question of the Superintendent will pursue the same course, but will on no account leave his place.

11. Any answer papers, or any work in Carpentry, etc., sent up without the candidate's name and number affixed will not be valued. The answer papers and drawings should be stitched or pinned together at the upper left-hand corner, and the whole folded in four, lengthwise (not crosswise into four). The plan of examination and the name and number should be written out clearly by the candidates on the top right hand side of the first page of the answer paper, as well as on the top of the paper after it is folded.

12. Candidates are forbidden to note down the answer to any question on the question paper itself; they will not be allowed to take any papers, except their question papers, out of the examination room.

13. Candidates are forbidden to tear up paper, or to throw ink or papers on the floor. All "spoilt copies, etc.," should be left on the desk where the candidates has been writing.

CULTIVATION STATEMENT FOR THE PERIOD—APRIL TO DECEMBER 1922.

General.—On an average, 8 per cent of the cultivation on dry lands and 7 per cent on wet lands take place in December, the percentages for the period April to December being 84 per cent dry) and 88 per cent (wet).

The heavy rains of November stimulated generally the cultivation in December with the result that the deficiency in sowings in previous months was almost made up.

2. *Dry lands—Area sown in December.*—The area was 17 per cent above average and 35 per cent above last year. Sowings were very satisfactory in Bellary and Anantapur. The area in the Carnatic was more than double that of last year and the Central districts showed an increase of 69 per cent over last year.

Area sown during the period April to December.—The area was nine per cent above the average. The increase was fairly general except in Anantapur, Cuddapah, Madura, and Tinnevelly. As compared with last year there was an increase of 13 per cent in North Arcot and 7 per cent in Trichinopoly and a decrease of about 12 per cent in Kistna and Chittoor and of about 7 per cent in Guntur, the Deccan districts, and Madura; on the whole the decrease was only 3 per cent as against 7 per cent for the period April to November.

3. *Wet lands—Area sown in December.*—There was an increase of 23 per cent as compared with the average and 38 per cent as compared with last year. This increase was fairly general. The area in the Carnatic was almost double that of last year and the area in the central districts about 3½ times as much as last year.

Area sown during the period April to December.—As compared with the average, the area increased by 10 per cent in the Circars and Central districts, 9 per cent in the Carnatic, and 5 per cent in the Presidency. As compared with last year, there were decreases in Vizagapatam, Anantapur, Cuddapah, Nellore, Chittoor, Coimbatore, and Madura counterbalanced by increases in Guntur, Trichinopoly, Ramnad, Tinnevelly, and the West Coast; on the whole the area was almost the same as last year though there was a deficiency of 3 per cent for the period April to November.

4. Details by districts are given in the statement appended.

Madras, 27th March 1923.

Bill introduced in the Council of State and Legislative Assembly, Reports of Select Committees presented to the Council and Assembly and Bills published under Rule 18 of the Indian Legislative Rules.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Legislative Assembly on the 21st March 1923:—

No. 12 OF 1923.

A Bill for the removal of doubts regarding the right of women to be enrolled and practise as legal practitioners.

WHEREAS it is expedient to remove certain doubts which have arisen as to the right of women to be enrolled and to practise as legal practitioners; It is hereby enacted as follows:—

Short title and extent.

1. (1) This Act may be called the Legal Practitioners (Women) Act, 1923.

(2) It extends to the whole of British India, including British Baluchistan and the Sonthal Parganas.

Definition.

2. In this Act, "legal practitioner" means a legal practitioner as defined in section 3 of the Legal Practitioners Act, 1879. XVIII of 1879.

Women not to be disqualified by reason only of sex

3. Notwithstanding anything contained in any enactment in force in British India or in the letters patent of any High Court or in any rule or order made under or in pursuance of any such enactment or letters patent, no woman shall, by reason only of her sex, be disqualified from being admitted or enrolled as a legal practitioner or from practising as such; and any such rule or order which is repugnant to the provisions of this Act shall, to the extent of such repugnancy, be void.

STATEMENT OF OBJECTS AND REASONS.

The Letters Patents of the several High Courts empower them to admit proper persons as Advocates, Vakils and Attorneys, and to make rules for their qualification and admission. Sections 6 and 17 of the Legal Practitioners Act, 1879, similarly give powers to the High Courts and the Chief Controlling Revenue-authorities to make rules for the qualification and admission of persons as Pleaders and Mukhtars, and as Revenue Agents, respectively. Sections 6 and 31 of the Bombay Pleaders Act, 1920 (Bombay Act XVII of 1920), contain similar provisions as regards Pleaders in that Presidency. Conflicting decisions have been given by High Courts as to the right of women, who are otherwise qualified, to be enrolled and to practise as legal practitioners.

The Government of India consulted Local Governments and other authorities on the question of whether women should be as eligible as men to enter upon a career as legal practitioners. The general opinion expressed was that in the present conditions of India, this question should be decided by Indian opinion. An opportunity of obtaining the views of the Assembly upon the question arose in connexion with the motion moved by Dr. H. S. Gour for the reference of his Bill further to amend the Legal Practitioners Act, 1879, to a Select Committee. During the course of the debate upon that Resolution, it was indicated that the acceptance of the motion by the Assembly would be regarded as an acceptance of the principle that no woman shall, by reason only of her sex, be disqualified from being admitted or being enrolled as a legal practitioner, or from practising as such in any court of law. The motion was accepted and in accordance with the undertaking given in the course of the debate on the motion the present Bill has been prepared to give effect to this view.
